Art Unit: 3711

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,328,658 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

Claims 1-25 are rejected as being based upon a defective reissue oath under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The declaration states that the patentees "claimed less than they had a right to claim" because they didn't broadly claim loading/unloading during motion of the cabins. Such statement would not cure the error of claiming less. The patent claims cover "during motion of the cabins" because the claims don't contain a limitation re motion or no motion. The broadening issue exists in the present reissue application. Claim 24 omits the waste pin of claim 1 and the axle of the other independent claim. A supplemental oath is required to specify as the error of "claiming less" by omitting either the waste pin limitation or the axle limitation.

Art Unit: 3711

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.
